CommBank Property Guide iPhone - smarter property insights while your customers are on the move

Commonwealth Bank is leveraging new technology to help Australians make an informed decision when it comes to making their biggest financial commitment.

With the **CommBank Property Guide iPhone** application (app) anyone buying or selling a property or looking to keep on top of the property market can find out the information they need while they are on the move. By simply holding up the iPhone and taking a photo of a property, users can access details such as past sales history, suburb snapshot, current property listings in the area and recent sales.

Through the Property Guide app, customers can also access insightful tips and tools including a repayment calculator, detailed suburb profiles revealing demographics, median house price, property hotspots and capital growth trends.

The app is now available to download for free from the [Apple iTunes store](#) and it will help your customers make smarter property decisions with detailed insights and trusted advice.

The technology is called 'augmented reality', and this type of functionality is set to revolutionise the way home buyers search for a home.

The iPhone app and Commonwealth Bank's current offer of Customer Ordered Valuation are the sure ways of ensuring your customers can access their dreams of home ownership quicker. We are determined to earn your business, not count on it.
