## CommBank Kaching – the future of mobile payments

Today the Commonwealth Bank is launching its new iPhone app, CommBank Kaching – a move that places the Bank as a world leader in mobile banking.

From today, customers who download the free app will be able to make payments to contacts easily via their mobile number, email address or Facebook. If the user has an iPhone 4S or iPhone 4 they can purchase an iCarte case within the app enabling them to make 'Tap and Go' payments with their iPhone at any PayPass terminal worldwide.

This new application will revolutionise the way people shop and make payments to each other. The need to rely on cash, bank transfers and cards will be a thing of the past for Commonwealth Bank customers with CommBank Kaching.

Customers just need to be registered for NetBank with NetCode to make payments and purchases through the app, and recipients only require an Australian bank account.

To download the app on your iPhone, search for 'CommBank Kaching' in the iTunes store.

The Kaching icon

Familiarise yourself with Kaching and talk to your customers about this new fast, safe and easy mobile banking experience.
